

## Avantium releases agenda for 2021 Annual General Meeting

---

**AMSTERDAM, 6 April 2021, 18:00 hrs CEST – Avantium N.V., a leading technology company in renewable chemistry, has published its agenda for the upcoming Annual General Meeting of Shareholders (AGM) to be held on 19 May 2021.**

---

Given the COVID-19 pandemic and the related measures to protect the health and safety of all participants to the AGM, Avantium has decided that the AGM will be a fully virtual meeting. This means that shareholders will be able to attend the AGM via webcast. For more details, please be referred to the convocation for the AGM.

The meeting documents, consisting of the AGM agenda and the explanatory notes, the 2020 Annual Report, and the 2020 Remuneration Report, are available on the Avantium website: <https://www.avantium.com/corporate-governance/#shareholders-meeting>.

### About Avantium

Avantium is a leading technology development company and a forerunner in renewable chemistry. Avantium develops novel technologies based on renewable carbon sources as an alternative to fossil-based chemicals and plastics. The company currently has three technologies at pilot and demonstration phase. The most advanced technology is the YXY<sup>®</sup> plant-to-plastics-technology that catalytically converts plant-based sugars into a wide range of chemicals and plastics, such as PEF (polyethylene furanoate). Avantium has successfully demonstrated the YXY<sup>®</sup> Technology at its pilot plant in Geleen, the Netherlands. The second technology is the Dawn Technology<sup>™</sup> that converts non-food biomass into industrial sugars and lignin in order to transition the chemicals and materials industries to non-fossil resources. In 2018, Avantium opened the Dawn Technology<sup>™</sup> pilot biorefinery in Delfzijl, the Netherlands. The third technology is called Ray Technology<sup>™</sup> and catalytically converts industrial sugars to plant-based MEG (mono-ethylene glycol): plantMEG<sup>™</sup>. Avantium is scaling up its Ray Technology<sup>™</sup> and the demonstration plant in Delfzijl, the Netherlands opened in November 2019. Next to developing and commercialising renewable chemistry technologies, the company also provides advanced catalysis R&D services and systems to customers in the refinery and chemical industries. Avantium works in partnership with like-minded companies around the globe to create revolutionary renewable chemistry solutions from invention to commercial scale.

Avantium's shares are listed on Euronext Amsterdam and Euronext Brussels (symbol: AVTX). Avantium is included in the Euronext Amsterdam SmallCap Index (AScX). Its offices and headquarters are in Amsterdam, the Netherlands.
